PROFESSIONAL SUMMARY

Product-focused Full-Stack Engineer with 2.5+ years of end-to-end ownership across healthcare platforms, HRMS systems, cross-platform desktop applications, ERP modules, ECG analyzers, and compliance software. Proven ability to ship complex, production-grade systems rapidly — delivered a 23-module HRMS MVP in under 20 days. Currently building and scaling my own D2C brand (Honeyvan) end-to-end — engineering, e-commerce operations, and growth — while continuing freelance client delivery. Strong frontend expertise in React paired with solid backend execution in Node.js, REST APIs, and real-time systems. Experienced with medical device integration (BLE/UART), live clinical deployments, and security-first development using JWT, refresh tokens, and RBAC.

EXPERIENCE

Founder & Full-Stack Developer — **Honeyvan (Green Earth Enterprise)***Apr 2026 – Present*

- ▶ Built and maintain honeyvan.in end-to-end — a D2C e-commerce platform for a raw honey brand, from architecture to deployment.
- ▶ Implemented online payment gateway integration, COD order flow, and parcel/courier service integration for order fulfillment.
- ▶ Designed and built a custom admin panel for inventory, order, and content management, with ongoing feature customization.
- ▶ Own SEO strategy and social media presence for the brand, alongside FSSAI/GST compliance and product labeling.

Freelance Full-Stack Developer — **Independent / Multiple Clients***Apr 2026 – Present*

- ▶ Delivered production websites for multiple clients using Next.js, Prisma, MongoDB, and NextAuth, including e-commerce and brochure-style marketing sites.
- ▶ Handled full project lifecycle — requirements gathering, architecture, deployment (Netlify), and post-launch support/debugging.
- ▶ Maintained continuous freelance delivery and client work throughout, alongside building the Honeyvan brand.

Full-Stack Developer — **Svitch Bike***Mar 2026 – Apr 2026*

- ▶ Designed and shipped a 23+ module HRMS MVP covering employee onboarding, leave management, attendance tracking, payroll, performance reviews, and document management — solo, in 20 days.
- ▶ Architected a secure backend with JWT authentication, refresh token rotation, and role-based access control (RBAC) for multi-level HR permissions.
- ▶ Configured MongoDB Replica Sets for data durability and high-availability in a production environment.
- ▶ Followed clean code standards throughout — modular architecture, separation of concerns, and consistent API design patterns.

Full-Stack Engineer — **Kali Medtech Private Limited***Jan 2024 – Dec 2025*

- ▶ Designed and delivered cross-platform ECG desktop applications (Electron + React) supporting Windows, macOS, and Linux.
- ▶ Implemented BLE and UART-based device communication for Resting, Holter, and TMT ECG workflows.
- ▶ Built offline ECG data extraction, binary parsing, validation, and MQTT-based device-to-cloud upload pipelines.
- ▶ Developed real-time waveform visualization, session management, and multi-device connectivity.
- ▶ Delivered ERP dashboards and backend APIs including invoicing, ledger handling, and cost automation logic.
- ▶ Contributed to OEA (OOM ECG Analyzer) with multi-file uploads, chunked ingestion, and interpretation workflows.
- ▶ Designed QR-based cross-device authentication for seamless mobile-to-web login.
- ▶ Built an organization-wide Quality Management System (QMS) covering complaints, device/material issues, and regulatory documentation.
- ▶ Implemented role-based access control, real-time dashboards, socket-based notifications, and audit-ready PDF generation.
- ▶ Collaborated with AI/ML teams on ECG rhythm analysis pipeline integration and testing.
- ▶ Supported production deployments in live hospital environments with direct on-call issue resolution.

Web Designer Intern — **ByteParity Technologies***Jul 2023 – Dec 2023*

- ▶ Converted Adobe XD / Figma design files into pixel-perfect, responsive HTML, CSS, and JavaScript implementations.
- ▶ Ensured cross-browser compatibility, mobile responsiveness, and design-to-code accuracy across all deliverables.
- ▶ Worked in a professional Git/GitHub and Linux environment with real project workflows.

KEY PROJECTS

Honeyvan — D2C E-commerce Platform

- ▶ Founder-built brand website with payments, COD, logistics integration, and a custom admin panel; owns SEO and social media.

HRMS System — Switch Bike

- ▶ Solo-built a 23-module HR management platform in 20 days using the MERN stack.
- ▶ Implemented JWT + refresh token auth, MongoDB Replica Sets, RBAC, and clean modular architecture from scratch.

ECG Desktop Application — Kali Medtech

- ▶ Cross-platform Electron + React app with BLE/UART device communication and real-time ECG waveform rendering.
- ▶ MQTT-based cloud upload pipeline; deployed in live hospital environments.

Quality Management System (QMS) — Kali Medtech

- ▶ Organization-wide compliance platform with audit-ready PDF generation, RBAC, and socket-based real-time notifications.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, Socket.io, MQTT

Database: MongoDB (Replica Sets), Prisma, Mongoose, Basic SQL

Desktop: Electron.js, BLE, UART, Binary Data Parsing

Auth & Security: JWT, Refresh Token Rotation, RBAC, NextAuth, QR-based Auth

Systems Built: HRMS, ERP, QMS, ECG Analyzer, D2C E-commerce, Real-Time Dashboards

Dev & Deployment: Git, GitHub, Netlify, SonarQube, Linux, Postman

EDUCATION

Bachelor of Computer Applications (BCA) — S.P. University, Gujarat

WHAT SETS ME APART

- ▶ Speed & ownership — shipped a 23-module HRMS solo in under 20 days with production-quality code.
- ▶ Founder mindset — built and run my own brand end-to-end, from engineering to operations and growth.
- ▶ End-to-end delivery — from device hardware integration (BLE/UART) to cloud pipelines to polished UI.
- ▶ Security-conscious — JWT, refresh tokens, RBAC, and replica sets implemented by default, not as afterthoughts.
- ▶ Remote-ready — self-directed, fast learner, comfortable with async workflows and tight deadlines.
